Remco Stoeten

Front-end developer with a degree in graphic design.
Aspiring to be a allround engineer, or as we say in
the Netherlands; not just a simple divjesschuiver. I
love UI prototyping and building projects from the
ground up.

⊕ Lemmer, the Nethelrands, CET

About

Started off my journey in e-commerce building custom Magento 2 webshops for a
agency. After that, I moved to **SaaS**, in-house for multinationals and currently
employed in SaaS exclusively for non-profit and government organizations. My
current go-to stack is **Next.js** (React), **TypeScrip**, GraphQL/REST/own API paired
with any styling solution whether it's **Tailwind**, modules, or styled components,
and if needed a (cloud/BaaS) database provider like Firebase, Convex,
or SQLite.

Although my current focus is front-end focused, I have strong all-round
technology interest and am quite involved in the space. I love exploring newer
tools (e.g. **Svelte, Solid, Qwik**) but also have an interest in learning more
complex languages like Rust, Zig, OCaml and on the short-term Go. I've done a
little Python (scrapers, text-mutate-tools) and some Lua (game engine
scripting, NeoVim configuration) and quite some Bash.

Work Experience

Pleio - online samenwerken Remote   2023 - present
Frontend Developer
SaaS provider exclusively for non-profit organizations and governments. Primarily working on
the Pleio-platform (Intranet site builder in React, GraphQL). Also various tax and politic-
heavy applications. Everything fully WCAG compliant and open source.

Distil BV Remote   2022 - 2023
Developer
Sole dedicated front-end responsible for migrating legacy code to a new design using .cshtml
(Razor) templates, BEM SCSS structure, and vanilla + KnockoutJS JavaScript. Took initial
steps into the world of React while assisting in the rewrite of a legacy SaaS application in
React + .NET.

Tickles Digital Agency B.V.   2017 - 2022
Front-end Developer
Joined as a Front-end developer after an internship during media design studies. Developed
from a complete beginner to a self-sufficient Front-end developer capable of translating UX
designs into responsive code.

Education

ROC Friese poort Sneek   2013 - 2017

Got my degree in graphic design

Skills

`JavaScript` `TypeScript ❤️` `React` `NextJS ❤️` `GraphQL` `Styled Components`
`Tailwind CSS ❤️` `Magento 2 🤢` `KnockoutJS` `Framer motion` `jQuery` `HTML (BEM, WCAG)`
`CSS/SCSS/LESS/Modules` `REST` `Adobe Creative Suite` `Figma` `Convex` `Firebase` `SQLite`
`Postgres` `Docker`

Projects

Mostly hobby projects, some open source proffesional.

Pleio platform
A SaaS, intranet builder for non profit and goverment only.

`React` `Styled-Components`
`GraphQL`

FSV Portaal
Django backend with vanilla JavaScript + SCSS frontend.

`Django` `wcag` `JavaScript` `SCSS`

PDF Checker
Check accessibility of PDF's in Vue(2).

`Vue2` `wcag`

Vedder & Vedder
B2C webshop for jewelry.

`Magento 2`
`PHP, "scss", "jquery` `XML`
`KnockoutJS`

Alcomex
B2B webshop for technical parts.

`Magento 2`
`PHP, "scss", "jquery` `XML`
`KnockoutJS`

Quality Horse Products
B2B webshop for horse products.

`Magento 2`
`PHP, "scss", "jquery` `XML`
`KnockoutJS`

MineSweeper
A replica of the online casino game Dare 2 Mine by Hacksaw Gaming. I implemented a currency system which syncs all the data (bet size, wins, losses, etc.)

`TypeScript` `NextJS` `BaaS`
`Convex` `Tailwind`

Whatsapp Status Scraper
An automated scraper for WhatsApp statuses via NextJS api routes. No, I don't condone stalking, but I love exploring new technologies. I've built a Python Selenium Chromedriver WhatsApp status scraper but wanted more UI so I built a entire real tike table with all scraped metrics

`TypeScript` `NextJS`
`TailwindCSS` `ChromeDriver`
`Selenium`

snippets.remcostoeten.com
This is an app containing various snippets, guides, and productivity scripts I use personally or for my job. The site is maintained via Markdown.mdx and powered by Nextra, which is a static site generator built with NextJS and TypeScript.

`NextJS` `TypeScript` `Blog`
`Markdown`

UI portfolio
Minimal cv ui design with threejs

`NextJS` `Three.js` `TypeScript`
`Framer Motion`

Another cool UI design
Another cool UI design I've built. Itteration number thousand.

`NextJS` `TypeScript`
`Framer Motion` `UI`

GraphQL GitHub API portfolio
...graphql github api portfolio, sleak design.

`NextJS` `TypeScript` `Apollo`
`Framer Motion` `GraphQL`

Visualize Component Debugger (NPM package)
A npm package that helps you visualize react components to improve debugging and development experience.

`React` `NPM`

Personal Platform
A personal intraneti'm bulding for all kind of purposes. Finance, storage, calendar. New repo is private

`NextJS` `TypeScript` `API Routes`
`Tailwind` `Framer Motion`
`GraphQL`

URL Extractor
Just a tool I built because I got tired of other tools having slow Cloudflare protection. A working version is available at https://vsc.remcostoeten.com/ but the UI is not up to par, hence I'm reworking it here.

`NextJS` `TypeScript` `Regex`

WhatsApp Online Status Tracker
A tool that launches a chromedriver instance and scrapes the online status of a given WhatsApp user. Not because I condone stalking, but seemed like a cool project to learn scraping.

`Flask` `Python` `Selenium`
`ChromeDriver`

SVG to React Component Generator Scripts
A utility script to convert SVG files into React components. It reads SVGs from a directory, extracts content and attributes, and generates corresponding React components. Handles SVGs without specified dimensions by defaulting to 24x24. Components are named based on the SVG title or given a generic name.

`JavaScript` `Script`

shadcn-ui-lazymans-auto-importer
a scirprt I build to cleanup ShadN/ui imports because in big projects it can get a mess. And maybe because I kept forgetting the standalone download command for components.

`JavaScript`

HTML to React(JSX/TSX) Converter
I used to convert quite some codepens to react and got tired of online tools their cloudflare protection so I build my own converter. It converts HTML too JSX or TSX including easy creation of functional components with props and types. Not perfect, but does the job.

`NextJS` `TypeScript` `Regex`
`Headaches`

Visual Studio Code Landing in React
A portfolio site in the style of an IDE, in this case Visual Studio Code. Built with NextJS, TailwindCSS, Shadcn/ui, radix-ui, Clerk authentication, Firebase database for old features and new features are built on Planetscale which is MySQL and Prisma as ORM.

`NextJS` `TailwindCSS` `Shadcn/UI`
`Radix-UI` `Clerk` `Firebase`
`Planetscale` `Prisma`
